PAGE UTILITY
TERMS & CONDITIONS

1. Mark the envelope containing the bid per the instructions given on the "**INVITATION TO BID**". Any bids that are inadvertently opened because this statement was not clearly marked on the envelope will not be considered in the bidding process.
2. Contractor shall provide a bid form which lists each item with a clear description of the item, a unit price for the item and total price for the number of items, or they will not be considered. A sample form is included for a reference only. (Form does not need to be like sample but should provide information and costs for all parts of the project)
3. Inspection of materials and installation will be performed by the Owner throughout the installation process.
4. The Owner may grant additional time for installation when the Owner is at fault or if he is satisfied the installation is beyond the control of the Contractor.
5. Any work rejected by the Owner shall be re-done by the Contractor at the Contractor's cost.
6. Material provided for the job must be new. No used material will be allowed. Damaged material will not be accepted.
7. It is agreed that materials used shall comply with all Federal, State or local laws relative thereto, and that the Contractor shall defend actions or claims brought and save harmless the Owner from loss, cost or damage by reason of actual alleged infringements of latter's patent.
8. Bidder shall provide item, descriptions, unit prices and total prices for each item.
9. Bidder shall provide costs for labor, shipping and taxes.
10. A bidder offering foreign made merchandise must so indicate in his bid.
11. All prices **MUST** be **F.O.B. DELIVERY POINT**. **Tax & freight charges should be included in the total bid price.**
12. The award of the bids will be decided by the Owner.
13. Where the unit price and extension price are at variance, the unit price will prevail.
14. The Owner reserves the right to reject any or all bids, to waive an informality when in the opinion of the Owner it is to the best interest of the Owner to do so.
15. In case of default of the Contractor, the buyer may procure the articles or any excess cost or damages occasioned thereby.
16. Samples must be furnished where required.
17. In all specifications the words "equal or equivalent" are understood whether stated or not after each article giving manufacturer's name or catalog reference or on any patented article. Where brand names or manufacturer's names are used in these documents, they are intended to establish a standard of quality of materials, equipment function, and/or process. There is no intent to limit competitive bidding. The decision of Page Utility as to whether an alternate or substitution is in fact "equal" shall be final.

	Shipping		\$	\$
	Tax		\$	\$

Total Price \$\$\$\$\$\$

There are four (4) methods by which prospective bidders can get their bid packets to Page Utility Enterprises (PUE). We encourage bidders to be aware that in most instances, firms which advertise overnight delivery cannot actually provide that service to the city of Page because of the remote geographic location. PUE recommends that prospective bidders plan to send their bid packages several days in advance of the deadline date.

The four (4) available methods are as follows:

- Regular U.S. Postal Service (no delivery to PUE Office)
- U.S. Postal Service Express Mail (no delivery to PUE Office)
- Federal Express (no delivery until 2:00 p.m.)
- United Parcel Service (deliveries usually around 4:00 p.m.)

The mailing address for Page Utility Enterprises is:

Page Utility Enterprises
P.O. Box 1955
Page, AZ 86040-1955

The physical address for Page Utility Enterprises is:

Page Utility Enterprises
640 Haul Rd.
Page, AZ 86040-1955

Under the sealed bid process, FAX bids WILL NOT be accepted. It is the responsibility of the prospective bidder to get bid packages to PUE Offices by the designated deadline. If you have any questions or need further information, please call our office at (928) 645-2419.

PROJECT SPECIFICATIONS

Project:

Chlorine Delivery System Upgrade

Location:

Page, Arizona water treatment facility.

Project Scope:

- Remove existing chlorine delivery system components consisting of automatic chlorine control valves, inline chlorine ejectors, vacuum regulators, tubing and fittings.
- Provide and Install (2) new automatic chlorine control valves with a minimum of 100 ppd capacity and 4-20 mA flow control (pre and post chlorination).
- Provide and Install (2) new inline chlorine ejectors (may require modification of existing ejector water feed piping).
- Provide and Install (2) new vacuum regulators with built in auto switchover and mounting for 120 VAC ton container manifold heaters.
- Provide and Install new vacuum and/or chlorine delivery tubing and fittings.
- Provide Startup, commissioning and training services.

Contractor shall supply a bid on a separate sheet with detailed descriptions of all material to be used to complete this job. Also a description of any miscellaneous work that will be required to finish this job completely. On the bid sheet the total price shall be easily identified and include all costs, including materials, shipping, taxes, labor, etc.

A temporary feed system may need to be installed while the existing system is removed and the new system installed. There will not be extra compensation for this, it should be figured into the bid.

A site visit is highly recommended to get familiar with the existing chlorine delivery system and to know if any modifications will be needed for the new parts to be integrated into the existing system and if any fittings will need to be changed out.

Any questions, contact Doug King at 928-645-4316 or doug@pageutility.com.

Project to be completed by April 30, 2020.
